SWATCOM SC37 FLEXIMIC

SWATCOM SC37 FLEXIMIC

Flexible, easy to attach, detachable noise-cancelling microphone assembly, c/w TP-120, MIL-Spec connector for SWATCOM Active8

The SWATCOM SC37 Fleximic allows you to easily convert your Active8 headband into a communications headset.

The microphone connects into the Axillary port on your Active8 and has a TP120 plug enabling you to easily connect to a communications device of your choice. Weighing a mere 35 grams the microphone connector is designed to be as lightweight and unobtrusive as possible. The mic is made with Kevlar reinforced cables to ensure maximum levels of durability in the most difficult of conditions.

- The most flexible way to convert your existing headset into a communications headset*
- Noise-cancelling water resistant & durable flexi microphone for good communication in high noise
- 3.5 mm AUX for simple connection to the headsets dual audio speakers
- Can also be connected to SORDIN Supreme headsets with AUX connection to enhance flexibility
- Only works with headband headsets, not neckband
- Lightweight, only 35 grams
- Kevlar reinforced cables for extra durability
- Compatible with most common two-way radios and SWATCOM Multicom2-Pro duplex transceivers
- 12 months warranty against manufacturing defects
- CE approved

SWATCOM SC37 FLEXIMIC
